COURSE SYLLABUS

TARBIYAH AND TADRIS FACULTY OF BENGKULU

A. General Information

Department	: Tarbiyah Department
Program Study	: English Study Program
Semester/Room	: VI/B/C4.6
Course	: Language Teaching Method (LTM)
Lecturer	: Dr. Syamsul Rizal, M,Pd

B. Course Description

In this course I offer a foundation in the approaches, methods, and materials for the teaching of English as a second language and foreign languages from the perspectives of second language acquisition research and task-based language teaching pedagogy. My main goals are to teach teachers and applied-linguistics researchers about (and teach them how to apply to their teaching) the communicative approach and task-based language teaching principles in particular. The course has three parts. We begin by briefly reviewing the history and basic concepts pertaining to the field of language teaching methods (and post-methods, as will be explained). Second, we will dive into task-based language teaching, syllabus design, and lesson planning. And third, we focus on external factors that affect task-based language teaching and how teachers and learners can best use tasks. In class, everyone will write a teaching philosophy through an iterative peer, teacher, and self-review process.

C. Course Objectives

By the end of the semester, students in this course will be able to do the following.

1. Explain the development of language teaching methodologies and use the rationale behind current methods and teaching practices to inform one's own teaching practice and materials design.
2. Read, understand, and think critically about current research pertaining to teaching methods and language teaching techniques to inform curriculum development and future research projects.
3. Provide a professional review of foreign or second language materials in light of current trends in task-based language teaching. This exercise will be important after graduation: for textbook adoption, guidance in the use of tasks, or for the creation of supplementary task materials to overlay current non-task materials.
4. Convey to others a coherent and well-articulated, theory-based teaching philosophy grounded in empirically tested research on tasks. This conveyance will be useful and **online**, and will continue to be developed by the student in his or her professional life.
